Purpose of Course

The purpose of this course is to provide training to security trainers within soft target venues including hotel/casinos/resorts, large shopping malls, and large audience special events. The goal is to increase the capabilities of these individuals to provide training programs at their organizations for their security forces. After receiving this instruction, security trainers will be able to facilitate an awareness level training program presented through eight modules. These modules are designed to provide three levels of awareness information:

- Awareness information needed to function as a responder to the threat of terrorism within soft target areas;
- Awareness information needed to detect indicators of potential terrorist activities; and
- Awareness information needed to make informed, controlled, and safe responses to incidents involving improvised explosive devices (IEDs) or WMDs.

Scope of Course

The *Frontline Responder Train the Trainer Course* is a 2-day course, which provides an overview of terrorism awareness through facilitated seminars and practical exercises. The course provides seminars in chemical, biological, radiological, and explosive agents that may be used as WMDs, IED recognition, and indicators of suspicious behavior and activity. The course concludes with an instructor-led practical exercise in taking a critical look at the participants' properties and post-incident actions to be taken to secure an incident scene.

Target Audiences

The target audiences for this course are security trainers from soft target areas including hotels/resorts/casinos, large shopping malls, tourist facilities, and venues with large audiences.
